Brief Abstract

Description

This measure is used to assess the percentage of patients aged 18 years and older with the diagnosis of ischemic stroke or intracranial hemorrhage for whom consideration of rehabilitation services is documented.

To promote a comprehensive approach to performance improvement, the Stroke and Stroke Rehabilitation Measurement Set is intended for use in its entirety when measuring clinical quality in the care of eligible patients. Full implementation of this measurement set for patients with a diagnosis of ischemic stroke or transient ischemic attack (TIA) should always include the Physician Consortium for Performance

Rationale

All patients should be considered for rehabilitation services to meet the individual patient needs.*

*The following clinical recommendation statements are quoted verbatim from the referenced clinical guidelines and represent the evidence base for the measure:

Strongly recommend that patients in need of rehabilitation services have access to a setting with a coordinated and organized rehabilitation care team that is experienced in providing stroke services. The coordination and organization of inpatient post-acute stroke care will improve patient outcome. (Veterans Administration/Department of Defense [VA/DoD])

Primary Clinical Component

Ischemic stroke; intracranial hemorrhage; rehabilitation

Denominator Description

All patients aged 18 years and older with the diagnosis of ischemic stroke or intracranial hemorrhage

Numerator Description

Patients for whom consideration of rehabilitation services is documented (ordered rehabilitation or documented that rehabilitation was not indicated)

Evidence Supporting the Measure

Evidence Supporting the Criterion of Quality

A clinical practice guideline or other peer-reviewed synthesis of the clinical evidence

Evidence Supporting Need for the Measure

Need for the Measure

Use of this measure to improve performance

Evidence Supporting Need for the Measure

Data Collection for the Measure

Case Finding

Users of care only

Description of Case Finding

All patients aged 18 years and older with the diagnosis of ischemic stroke or intracranial hemorrhage

Denominator Sampling Frame

Patients associated with provider

Denominator Inclusions/Exclusions

Inclusions

All patients aged 18 years and older with the diagnosis of ischemic stroke or intracranial hemorrhage

Exclusions

None

Relationship of Denominator to Numerator

All cases in the denominator are equally eligible to appear in the numerator
